Category:OWASP Project

An OWASP project is a collection of related tasks that have a defined roadmap and team members. OWASP project leaders are responsible for defining the vision, roadmap, and tasks for the project. The project leader also promotes the project and builds the team.

If you would like to start a new project please review the How to Start an OWASP Project guide. Please send an email to owasp@owasp.org to discuss project ideas and how they might fit into O cont.
